Global Warming Presentation

Our Year 6 students had a wonderful experience during the recent global warming talk presented by Ximena Loria. They learned how the choices we make every day, such as how we use energy, the products we buy, and the way we treat the environment can have a powerful impact on our planet. Ximena explained in a clear and engaging way how global warming is affecting humanity, from rising temperatures and melting ice to stronger storms and the loss of biodiversity. The talk inspired our Year 6s to think more carefully about their actions and motivated them to take responsibility for protecting the planet for future generations.
